## What do we teach in our programme?

### ORIGINALITY

We encourage **originality** in writing. All children need is a little guidance on how to think out of the box and put their ingenious ideas into words. Through our four to eight steps exercises, all children can become original authors at a young age.

### GRAMMAR RULES

We guide students to become grammar geniuses at our centre. Good original ideas can only be fairly expressed if the child has a good grasp of the different parts of speech (adjectives, adverbs etc.) and tenses involved. Being a grammar genius is like an artist **having good brushes and paint** to work on his/her masterpiece.

### CRITICAL THINKING SKILLS

**What are you really trying to say?** Many children are crushed by the mountain of ideas that they have, but do not know how to express them clearly. We want children to analyse and ask many questions during their writing process. We want them to burrow relentlessly through their pile of ideas to reach the essence of the story that they are trying to tell their readers.

### COMPREHENSION TECHNIQUES

Learning to get **key points** from passages and stories will invariably improve your ability to express yourself clearly in your own writing. As the children learn to understand how good stories are structured, sequenced and presented, they will learn to translate those qualities into their own writing. Hence, **summary writing and comprehension exercises** are essential in our classes.

words  
have  
power

### POWER VOCABULARY

We are not asking you to be bombastic, BUT we do need you to have a good grasp of the words that can help you express your ideas better. Suitably used **idioms** and words can even add glitter to your writing and make it shine.
